SECTION I: INTRODUCTION AND OVERVIEW

The purpose of this handbook is to provide students, the college community, and the general public with essential information about the educational and behavioral performance requirements expected of individuals entering health professions. To ensure safe practice, the Division of Health Sciences (DHS) has developed specific policies and procedures, in addition to those already established by the College, that govern student matriculation in their respective programs. **It is the responsibility of the student to be familiar with and abide by the policies contained in this manual, the College Catalog, and Student Handbook and Planner, which are referenced throughout this document.**

Each student is issued a copy of the Division of Health Sciences Student Handbook and Policy Manual after admission to their respective program. The content is subject to change. Program-specific policy amendments, supplements, and requirements are contained in the program addenda. At the beginning of each course, the faculty member(s) will distribute a course syllabus. Students should refer to the course syllabus for additional policies, including but not limited to attendance, assessment instruments, make-up requirements, and criteria for successful completion.

Admission to one of the programs offered in the Division of Health Sciences is the first step toward entering an exciting, rewarding career. In order to be successful in any Health Sciences program, engagement in the educational process is essential. Becoming a caring, competent health care professional requires a major commitment of time, energy, and focus of one's efforts toward the needs of clients. This selfless dedication is what makes true professionals stand out. The faculty and administration at DHS are dedicated to helping students become professionals and achieve their educational and career goals.

Clinical agencies, hospitals, and facilities providing education to students may have policies and procedures in addition to those in this handbook.

Division of Health Sciences Mission Statement and Overview

Mission

The mission of the Division of Health Sciences is to prepare graduates to provide professionally competent, safe, ethical, compassionate healthcare and become lifelong learners in their field.

Philosophy

Administrators, faculty, and staff within the Division of Health Sciences believe that education is a lifelong endeavor where students are at the center of the learning continuum. Students ultimately become lifelong learners when engaged in teaching and learning environments that help them to achieve their personal and professional goals. We believe that all students have the ability to learn. Students are encouraged to identify their preferred style of learning, determine their strengths, and realize their potential. Students who develop the ability to think critically will be better equipped to learn new skills, acquire knowledge, and understand the attitudes and behaviors required to succeed in their field of study. Therefore, we believe the goal of the educational process is to teach for understanding and expand the view of the learner.

We believe that healthcare education requires a commitment to diversity, leadership, collaborative partnerships, and evidence-based practice. Accordingly, we are committed to a systematic review process to ensure programs maintain the highest standards and are reflective of current practice. All healthcare professional programs represent a blend of theory and reflective clinical practice that embraces cross-cultural beliefs and values.

Graduates from the Division of Health Sciences can respond to healthcare needs within local, national, and global environments. All healthcare professionals have the responsibility to ensure that quality healthcare is provided by engaging in effective leadership and social advocacy initiatives.

Core Values

Aligned with the Core Values of the College, the Division of Health Sciences believes that:

- Quality education in all health programs is based on current standards of practice, use of technology, and application of contemporary pedagogy.
- Students have the potential for success when academic and personal support services are provided throughout the educational process.
- Communication and teamwork are an integral part of the learning and working environment.
- Appreciation of diversity becomes the foundation for understanding and embracing the richness of differences in opinion, ethnicity, culture, and lifestyle.

- Change is embraced by a willingness to accept new ideas.
- Education becomes a pathway that fosters lifelong learning.

Division of Health Science Goals:

1. Prepare students for employment in a specific health career field.
2. Maintain external accreditation/approval of individual health science programs.
3. Establish academic benchmarks that assess student learning.
4. Promote engagement in community service activities.
5. Utilize a systematic evaluation process to maintain the highest current standard of practice.

September 9, 2009; revised October 16, 2009; revised November 13, 2009; revised January 27, 2010, March 24, 2010; revised May 3, 2013

Massachusetts Bay Community College is an affirmative action/equal opportunity employer and does not discriminate on the basis of race, color, national origin, sex, disability, religion, age, veteran status, genetic information, gender identity or sexual orientation in its programs and activities as required by Title IX of the Educational Amendments of 1972, the Americans with Disabilities Act of 1990, Section 504 of the Rehabilitation Act of 1973, Title VII of the Civil Rights Act of 1964, and other applicable statutes and college policies. The College prohibits sexual harassment, including sexual violence. Inquiries or complaints concerning discrimination, harassment, retaliation or sexual violence shall be referred to the College's Affirmative Action and/or Title IX Coordinator, the Massachusetts Commission Against Discrimination, the Equal Employment Opportunities Commission or the United States Department of Education's Office for Civil Rights.

For more information on Title IX, please visit www.massbay.edu/titleix, which includes contact information for the College's Title IX Coordinator.

SECTION II: Division of Health Sciences Policies

Section A: Academic Policies

A.1.0 Attendance

It is important to your academic success that you attend all classes in which you are enrolled and make up any work due to absences. For each course, your instructor will establish policies regarding class, clinical, and/or laboratory absences and make-ups (if any) and will include these policies in the course syllabus. Your course instructor has full and final authority to allow make-up work and/or absences. Frequent tardiness and absenteeism are not tolerated in the health care professions or by the DHS faculty.

As a student in a Health Sciences program at MassBay, you must follow policies that have been developed to meet the requirements of the appropriate accrediting agencies. To ensure your successful completion of the program and accreditation requirements, attendance in all health programs is mandatory for classes, laboratory sessions, and clinical rotations.

If you have clinical clock hour requirements, you should speak with your instructors about class and clinical attendance policies. Absences may be cause for program withdrawal. Students who demonstrate a pattern of tardiness or absence will receive a counseling notice regarding the attendance policy.

A.2.0 Student Progress

Students are advised that it is important to purchase the required textbooks and read all assigned chapters to be successful. Textbooks contain copyrighted material, and photocopying it is illegal.

To be considered in "good standing" within any of the DHS programs, students are required to achieve a minimum grade of 73% (C) in each Health Sciences Program course, except for Associate Degree Nursing (ADN) and Practical Nursing (PN) courses where the passing grade is a 75% (C), and the EMT and Paramedicine courses where the passing course grade is 77 % (C+). In science courses with a BI or CH prefix the passing grade is 73% (C). Students must pass all segments of courses (theory, laboratory, and/or clinical) to be successful in that specific health course.

Students whose grade in theory, clinical, or laboratory courses is below the minimum required at mid-semester will receive a midterm warning, consistent with the College's policy. Students who receive a midterm warning are required to schedule an appointment with the course's faculty member to develop a learning remediation plan.

Students must successfully complete all required prerequisite and co-requisite courses to continue in a Health Sciences program. It is the professional responsibility of each student to ensure adequate preparation for all program, course, lab, practicum, and/or clinical requirements.

Incomplete Grades: Should a student not complete all course requirements within the last two weeks of the semester but provide evidence of making significant progress toward such completion,

he or she may submit a written request to the Health Sciences instructor to receive an incomplete (I) grade. In each case in which an Incomplete is requested, the circumstances must be compelling and beyond the student's control. The Incomplete will not be awarded in cases of neglect on the part of the student, nor will it be given as a substitute for a failing grade. At the instructor's discretion, the "I" grade may or may not be awarded.

Incomplete grades may be given only in the following circumstances:

- The student must be in good academic standing in class, laboratory, and clinical;
- Attendance has been satisfactory;
- Illness, accident, or other extenuating circumstances prevent the completion of required work;
- Documentation has been provided by the faculty;
- Required work may reasonably be completed in an agreed-upon time frame, no later than the beginning of the next semester.

Instruction to Students:

To request an Incomplete grade, complete section I of the "Request form" and submit it, along with forwarding documentation, to your instructor. A copy of this form is included on page 45.

The instructor will specify the terms and conditions for making up the coursework in section II of the request form. Signed forms will be sent to the Dean for approval. The Dean will forward all approved forms to the Registrar for processing.

When the coursework is completed and with the Dean's approval, the instructor will submit a "Change of Grade Form" to the Registrar's Office.

If the "I" grade is granted, conditions for completion of course requirements will be stipulated in a written agreement to be signed by the instructor, the student, and Dean of the Division prior to the start of the next course in the program sequence. Students who do not resolve their incomplete grade will receive an 'F' and will not progress in the program.

A.3.0 Testing Policy

The specific testing policy for courses is found in the syllabus for each course. Any appeal of score/grade on an examination must be submitted in writing to the instructor within one week of the administration of the test. If a student must leave the room during the test, all test materials must be returned by the student to the testing proctor prior to leaving the testing room. Failure to comply with this stipulation may result in a failing grade for the test.

Test Review

Tests or exams may be considered "Secured" and will not be given to the student to keep after the exam is completed. These tests will be kept on file in the appropriate program office. Specific Health Sciences programs have test review policies. If a test review is permitted, it will be monitored by course faculty.

Make-up Exams

Students are expected to be present for all exams. The faculty recognizes that illness and emergencies may occur and, at their discretion, may allow the student to take a make-up test/exam. Students must notify the faculty prior to the exam time and provide reasons and documentation for the absence. The student must contact the primary course instructor on the day he/she returns to request a makeup exam and, if approved, arrange for an exam date. Faculty have the right to ask for documentation verifying the illness or emergency as part of their decision process to allow or deny a retest. A different examination will be administered.

During exams, the following rules apply:

1. All books, purses, tote bags, cell phones and other electronic devices, etc., will be placed in a designated area and remain there during the exam.
2. Dictionaries of any kind may not be used during an examination.
3. The student's name must be recorded on all test materials and Scantron forms as appropriate.
4. If a Scantron form is used, any erasures must be thorough for accurate scanning.
5. If a test review is offered, exam papers must be returned to the faculty afterward.

A.4.0 Performance Notification Process

Students who are not performing satisfactorily in any laboratory or clinical setting will receive a performance notification. The performance notification form is on page 37 of this handbook. The instructor will use the clinical objectives or competencies to identify areas of weakness and determine the remediation needed to ensure compliance with student learning outcomes. Repeated performance notification may lead to a failing grade. Students are expected to complete all learning outcomes by the end of the course. Infractions of the policies, performance codes, or inadequate levels of academic/clinical performance may be communicated to the student through a written warning. A record of such a written warning shall be entered into the student's file.

A.5.0 Student Grievance Procedure

The student grievance procedure is described on page 56 of the current MassBay Community College Student Handbook.

A.6.0 Grade Appeals

The first step in the grade appeal process is to contact the faculty member in writing within 10 calendar days of the last day of the instructional period, stating that you would like a review of your course grades. Grade appeals are to determine if there are any mathematical errors in computing the final course grade.

The student grade appeal process is described in the current MassBay Community College Student Handbook.

Section B: Professional Behavior

B.1.0 Division of Health Sciences Code of Student Conduct: Professional Integrity / Behavior Policy & Affective Domain Standards

The Division of Health Sciences Faculty has identified criteria for professional performance under the standards of the affective domain. Faculty has a legal and ethical obligation to inform students of behaviors that are inconsistent with these standards and to act to ensure that any inconsistency is acknowledged and corrected by the student. Students are responsible for integrating an understanding of professional and ethical standards associated with their discipline in order to meet the criteria identified below. Faculty have the right and the responsibility to apply reasonable professional judgment to determine if a standard has or has not been met.

- *Standard 1 Accountability:* To exhibit a willingness to accept responsibility for their own actions and the consequences of their behavior.
- Standard 2: *Adaptability/Flexibility:* To adapt to new, different, or changing requirements or circumstances positively and constructively.
- Standard 3: *Assertiveness/Effective Communication*: To integrate an understanding of the need to communicate effectively by analyzing priority needs, conveying those needs clearly and directly, and working toward a mutual understanding and participation in an appropriate action.
- Standard 4: *Compassion and Empathy*: To view situations from the perspective of the other person and take appropriate actions to preserve the dignity and worth of others.
- Standard 5: *Diligence and Dependability:* To exhibit a strong work ethic, persistence toward positive outcomes, and consistency in the performance of all duties and responsibilities.
- Standard 6: *Honesty and Integrity*: To exhibit truthfulness and accuracy in all actions, conduct themselves in a fair and ethical manner, and work to continuously uphold the values of the health care profession they are affiliated with.
- Standard 7*: Respect***:** To exhibit esteem and deference to other persons or entities that reflects an awareness and acceptance of diverse cultural and social norms.
- Standard 8: Other Standards Specific to the Division: refer to program addendum for codes of ethics/conduct maintained by the profession

Each program will assess individual students for any or all of those behaviors listed above. If a student does not demonstrate these behaviors at appropriate levels in all domains, it may negatively affect his or her grade and/or ability to complete the program.

B. 2.0 Affective Domain Standards of Performance Violation Policy and Procedure

Should faculty determine that a student's behavior violates one or more of the affective domain standards, an affective domain warning will be issued to the student. Upon discovery of the violation, faculty has up to one week to investigate and issue the warning to the student. In certain instances, the student may be withheld from clinical until the process is carried out and the student completes corrective action. Once a student is notified that they will receive an affective domain warning, the student has 48 hours to meet with the faculty. At the discretion of the faculty or department chair, in certain instances, the student may be withheld from clinical, lab, or lecture until the process is carried out and the student completes corrective action.

The student will meet with faculty and have the opportunity to review a written summary that explains the nature of the violation, any required remedial action, and its implications for the student. A copy of the affective domain will go to the Program Director and will become part of the student's permanent record. Any affective domain violation may impact the student's ability to seek readmission, serve as a student representative, or receive a favorable recommendation for professional or educational purposes.

Recommendation for Dismissal from the Health Sciences program based on Affective Domain violations may occur when a student has received two Affective Domain Warnings and a third Affective Domain Violation occurs.

B.3.0 Cell Phone Policy

In keeping with the "respect" affective domain above (Standard 7), the Division of Health Sciences adheres to the following policy regarding the usage of cell phones during class time:

- Cell phones will be off during all class and lab time.
- Students and instructors will not make or receive cell phone calls during class and lab time.
- Students and instructors will not send or receive text messages during class and lab time.
- Unless required for completing clinical assignments, Cell phones will not be used at clinical in patient-care areas, and students must adhere to the policies of the clinical agency.

In the case of an emergency where it is ***vital*** that the student or instructor keep a cell phone turned on, it should be in vibrate mode, and should be answered outside of the classroom or lab. *It is the student's*

responsibility to notify the instructor before the start of class that an emergency call is due and that the student's cell phone will be on. It is the instructor's responsibility to notify the students of this situation before the start of class that an emergency call is due and that the instructor's cell phone will be on.

Use of a cell phone for any purpose during a class or lab other than for an emergency situation as stated above, will result in the student being asked to leave the class or lab for the remainder of class/lab time. The student is responsible for the missing material as well as for making up the time missed in class/lab. In addition, the student will receive a written warning indicating that the affective domain competency was not met.

B.4.0 Social Media/ Electronic Communication Policy

For the purposes of this policy, social media/electronic communication is defined as the use of email, electronic images, blogs, networking sites, applications, chat rooms, forums, video sites and other platforms. This policy applies to information posted in private or protected sites that can be accessed or shared by other users.

Faculty recognize that the use of social media to communicate has become commonplace. The implications for healthcare providers and healthcare students are serious. The accessibility and efficiency of technology make it easy to post content or images without considering the proprietary, confidential, or professional implications of such behavior.

The DHS holds the health sciences students to the highest standards for the responsible use of social media and electronic communication. Standards have been established that are aligned with the professional and ethical codes of each discipline.

The following behaviors are considered grounds for recommendation for dismissal:

- The use of social media to make disparaging remarks about other students, faculty, staff or patients, the division, individual departments or clinical affiliates/partners and associated individuals and communities- even if nicknames or codes are used and/or identifying information appears to have been removed.

- The posting, distribution or dissemination of patient, student, facility, laboratory or classroom images or associated content (please note: taking pictures, videos or audio recordings in the classroom or clinical agency is strictly prohibited without the permission of all parties involved).

- The posting of any content or images that could in any way compromise the safety, reputation and/or professional image of the Health Sciences Department, staff, faculty or students.

- The posting of any content or images that could in any way compromise the safety, reputation and/or professional image of clinical affiliates, partners, communities or individuals associated with the Division of Health Sciences or its departments.

- Posting inappropriate, suggestive, abusive, violent, potentially threatening, derogatory or discriminatory content in networks, forums or platforms while identifying oneself as a student within the Health Sciences Division. Note: Identification as a Division of Health Sciences student can be established through both statements and images on electronic and social media sites (e.g., wearing a uniform or posting a college, division, or department logo).

- The use of any electronic communication or applications for the purpose of distributing or disseminating information that could be used to commit acts of academic dishonesty or fraud.

- The use of any electronic communication or applications to share or distribute proprietary academic or facility information, including, but not limited to, policies, procedures, or patient care tools.

Students are encouraged to view the following sites for tips for the responsible use of social media by healthcare professionals. Please note that nothing in these documents negates the policies established by the Division of Health Sciences.

http://www.nursingworld.org/FunctionalMenuCategories/AboutANA/Social-Media/Social-Networking-Principles-Toolkit.aspx

https://www.ncsbn.org/2930.htm

B.5.0 Snow/Weather Emergency Policy

If the College closes due to inclement weather or for any other reason, all classes, clinical, and laboratory classes are canceled. The student handbook and the College website (www.massbay.edu) provide information on the various communication methods used by the College to notify everyone of the College's closure and course cancellations.

Students are expected to attend their regularly scheduled classes, clinical and practicum when the College is open, and no official announcement has been made to close the College or cancel classes.

Students who believe that conditions are unsafe for travel to class or clinical/practicum must call their instructor and the clinical agency to explain why they are not able to attend the regularly scheduled class or clinical/practicum.

If a student and faculty member arrive at a clinical site before the school closing is announced, students and faculty will remain at the clinical site until the closing is announced. Students will be expected to leave the agency as soon as it is feasible to do so after the closing announcement is made. Any student who is in a preceptor clinical experience will be notified of the College closure by each program's Clinical Coordinator and/or Department Chair.

If the closing announcement occurs while students are en route to classes and arrive as the College is closing, students will be expected to return home without attending any classes. Cancellations that occur while classes are in session will require students and faculty to leave the campus as soon as possible after the announcement.

Make-up classes and clinical may occur at the discretion of each specific program within the Division of Health Sciences if the College had to close.

Section C: Recommendation for Dismissal, Appeal of Dismissal, and Readmission Policies

Students enrolled in Health Sciences programs are expected to be familiar with and follow the College's Code of Conduct, Division policies, Program policies, and course syllabi. When a student is found to be in violation of these policies, and after appropriate interventions and warnings have occurred, the student will be recommended for dismissal from their program, subject to due process. The Dean of Health Sciences will notify the student that they have been dismissed via MassBay email and certified mail. This is a dismissal from the Health Sciences program, not a dismissal from the College; however, a violation of the College's Code of Conduct may be grounds for dismissal from the College. The appropriate faculty

or department chair will advise the student of the process and next steps, utilizing the Program Dismissal Worksheet, which the student will be asked to sign.

C.1.0 Medical Leave Policy

Students who leave a course mid-semester with verified medical or family illness documentation will be withdrawn from the course but not the restricted health sciences program. Students who are granted medical or family leave will be accommodated in the subsequent offering of that course, after first providing medical documentation approving their participation. Students will have 12 months to be reinstated in the withdrawn course for medical reasons. If additional time is required, the student will be withdrawn from the health science program and, if eligible, provided the readmission process. Students coming back from medical leave will be required to pay tuition for all enrolled courses. Students are only eligible for medical leave during a semester. Medical leaves will not be granted once the course is completed and/or grades have been issued.

C.2.0 Grounds for Recommendation for Immediate Dismissal

Demonstration of any of the following actions or behavior is grounds for recommendation for immediate dismissal, contingent upon the student's right to due process as outlined in the Appeals Process flowsheet in this handbook:

a. When the Affective Domain Warning identifies multiple violations of standards;
b. When the student refuses to accept or implement the corrective actions, and/or
c. When the precipitating behavior or response is egregious (e.g., reckless, threatening, abusive, or illegal). In this case, the Associate Dean of Students, as the College's Code of Conduct Officer, will be consulted.

Students have the right to appeal the program dismissal as outlined in this handbook and described in the Appeal of Dismissal from the Division of Health Sciences Programs policy.

C.3.0 Appeal of Dismissal from Division of Health Sciences Programs

Process of Appeal of Dismissal

A student has the right to appeal a dismissal from a Health Sciences program related to affective domain violations as outlined in the Division of Health Sciences Student Handbook, the appropriate program addendum, and/or the course syllabus, should the student believe they were wrongly dismissed.
Students must follow the appropriate appeals process listed below. Students may attend classes and laboratory sessions, but not clinical rotations, during the appeals process, if permitted by the Program Director.

The following four-step process outlines the appeal process for dismissal from a Division of Health Sciences program.

Step 1
Within five calendar days from the date of the recommendation for dismissal from the program, the student must submit, in writing, reason(s) why he or she believes the decision was wrong, reason(s) why the student should be reinstated, and any additional information or documentation that would support the appeal to the Dean of Health Sciences.

Step 2
The program/faculty will provide the Dean of Health Sciences with student records related to the student's initial recommendation for dismissal from the program within five calendar days.

Step 3
The Dean of Health Sciences will convene the Appeals Committee of three voting faculty members to review and judge the merits of the student's appeal. The committee members will be Health Sciences' faculty outside the student's program, a representative from outside the Division of Health Sciences, and the Dean of Health Sciences. Depending on the nature of the appeal, other individuals may be consulted as necessary. If the reason for dismissal involves a College Code of Conduct violation, the Associate Dean of Students/Code of Conduct Officer will be consulted. The Dean of Health Sciences will provide the Appeals Committee with all documentation submitted by the student and the program/faculty. The student does not appear in this meeting in person. The Appeals Committee will either overturn or uphold the recommendation for dismissal.

Step 4
The Dean of Health Sciences will send a written communication of the decision to the student. Decisions made by the Appeals Committee are final.

Appeal of Dismissal and Grade Appeal Processes Flowchart

During the processes described below, the student:

- May enroll and attend lecture and laboratory sections with Program Director permission.
- May NOT attend clinical courses.
- Is subject to all costs associated with course enrollment and Add/Drop policies.

Grade Appeal

Student must initiate College Grievance Policy at Level 1 - Informal Procedure (College Handbook) within 10 calendar days of the end of the instructional period.

Faculty responds to student appeal within 10 calendar days.

Student may decide to pursue College Grievance Policy at the Level 2 - Formal Procedure if the student is unsatisfied with the Faculty response or if the Faculty fails to respond within 10 calendar days.

If the appeal is resolved in the student's favor, the Program will attempt to return the student to clinical activites based on the curriculum, availability, and other factors.*

Appeal of Recommendation for Immediate Dismissal OR Affective Domain Violation(s) Dismissal

Within **5** calendar days of notification of dismissal, student must submit, in writing, why he/she/they believe the decision was wrong, why he/she/they should be reinstated, and any additional information or documentation to support their appeal to the Dean of Health Sciences.

Within 5 calendar days of the student submitting documentation, the Faculty provides the Dean of Health Sciences with student records related to the recomendaton for dismissal from the program.

The Dean of Health Sciences will convene an Appeals Committee (Step 3 above) and will provide all documentation submitted by the student and program/faculty. The Dean will participate in a non-voting capacity. The Appeals Committee will either overturn or uphold the recommendation for dismissal.

The Dean of Health Sciences will send a written communication of the decision to the student. Decisions made by the Appeals Committee are final.

If the appeal is resolved in the student's favor, the Program will attempt to return the student to clinical activites based on the curriculum, availability, and other factors.*

*Each Program within the Division of Health Sciences has specific procedures and policies concerning the return of the student to clinical activities based on the program curriculum.

C.4.0 Readmission Policy

Students who have been dismissed or who have withdrawn from any program within the Division of Health Sciences at MassBay Community College will be considered only once for readmission to the same program. Students who have not been successful in one health sciences program can apply for admission to a different health program if they have an overall College GPA of 2.0 or better. Students who have been dismissed or withdrawn from a program for reasons of "clinically unsafe practice/behavior" as defined in the DHS Student Handbook and Policy Manual (**see E.14.0)** or who violate the College's Student Code of Conduct are not eligible for admission/ readmission to any DHS program. **See program addenda for specific requirements for admission/readmission.**

Application for readmission must be made within 12 months of withdrawal or dismissal from the original program. Readmission application deadlines are February 1 for the fall semester and June 1 for the spring semester. Qualified candidates will be selected from a readmission pool and based on the seat availability for that course and/or program.

Based on specific course/program requirements and accreditation standards, students may be required to retake courses, take competency exams, or undergo skill testing prior to readmission, even if courses have been completed successfully. Should the student not attain a passing grade on skill or competency testing, they will be required to retake the course(s) in their entirety.

Section D: Health and Immunization Requirements

Complete immunization and other required documentation are necessary for participation in a Health Sciences program. All immunization and CPR documentation is managed by Viewpoint, a secure, web-based platform. Students will receive instructions on creating a personal profile, called a "Viewpoint Account," and on uploading their immunization and CPR documentation. Viewpoint will send the student email "alerts" when documentation is missing, incomplete, or needs updating. The Division of Health Sciences faculty will refer to Viewpoint account data to determine whether a student is cleared for clinical. The following items are required by your selected program's due date or within 30 days of the first day of the semester. **Failure to submit all the forms below on time and in the proper format will jeopardize the student's place in his/her program. Jeopardize means the student will not be allowed to start the program or will have to withdraw if they have started the program and documents are found not to meet submittal or compliance requirements.**

Immunizations:

Hepatitis B -

You must allow a minimum of 6 months to complete the series. For students in Associate Degree Nursing, Central Processing Technology, Medical Assistant, Diagnostic Medical Sonography, Paramedicine, Phlebotomy, Practical Nursing, Radiologic Technology, and Surgical Technology programs, a positive Antibody Titer is required. This may be submitted along with the vaccine or alone. Documentation of the Antibody titer must include numerical results and an indication of 'positive' or 'reactive' status, and must be on the MassBay medical form, a laboratory report, or a physician's verification of results. If the titer is negative or equivocal, new alerts will be created for you to repeat the vaccine series and antibody titer. Individuals who document negative or non-reactive antibody titers following two vaccine series are considered 'non-responders' and must provide a letter from their healthcare provider. Students in the EMT program are required to submit the three doses of the Hepatitis B Vaccine OR a positive antibody titer (lab report or physician verification of results required).

Tuberculosis Testing –

2-Step TB/PPD Skin Test or Chest X-Ray or QuantiFERON-TB or T-Spot - An initial 2-Step TB screening, QuantiFERON or T-Spot blood test, or negative Chest X-Ray is due by the published deadline for your program. This process for the 2-Step TB must be followed:

> Step I: PPD (Purified Protein Derivative) "implant" is injected into the forearm. In 2 - 3 days, this implant must then be "read" as negative and documented by a clinician.
>
> Step II: Within 3 weeks of completing Step I, students are required to return to the clinician's office for a second "implant." Again, the student is required to return in 2 - 3 days to have this implant read and documented as negative by the provider.

Once students have completed Steps I and II, only a single TB implant is required annually and must be updated each year to remain in compliance with medical requirements.

If you have a positive TB/PPD result, submit documentation of a clear (negative) Chest X-ray.

A negative symptom review check by a health care provider is required annually thereafter.

Tetanus & Diphtheria (Td) or Tetanus/Diphtheria/acellular Pertussis (Tdap) - Documentation of one dose of Tdap at or after 7 years of age. If it has been more than 10 years since the Tdap was given, a Td booster is required.

Measles, Mumps, Rubella (MMR) 2-Dose Vaccine or Titers* - There must be documentation of either a positive antibody titer for all 3 components OR documentation of each vaccination. If the titer is negative or equivocal, 2 booster shots are required.

Varicella 2-Dose Vaccine or Titer* - There must be documentation of either a positive Varicella antibody titer OR vaccination. If the titer is negative or equivocal, 2 booster shots are required.

Seasonal Influenza Vaccine (when available) – Submit documentation of a flu shot administered in August prior to the upcoming flu season OR a declination waiver. Students who cannot be immunized for the flu may be required to wear a mask in clinical settings.

COVID-19 Bivalent Vaccine Dose – Submit documentation of a Bivalent Booster dose (after September 2022. Associate Degree Nursing and Practical Nursing students may submit documentation of a medical exemption provided by a healthcare provider. Students in other programs may submit a declination form or a medical exemption. These forms are available for download on the students' Viewpoint accounts.

Report of Physical Examination & Immunization Record - This requires the student's physician to fill in confirmation of immunizations you've received and your physical exam results within the past year.

** Titers are laboratory blood tests to determine immunity to specific diseases. They are not immunizations.*

Some clinical facilities may require additional information and/or screenings prior to clinical placement. Examples include submission of social security number; Fingerprinting; Drug-testing; CORI checks; CNA Registry Check, COVID-19 Vaccine and additional immunizations.

Meningococcal Vaccine (for full-time students who are 21 years old or younger) – 1 dose MenACWY (formerly MCV4) received on or after the student's 16th birthday. Doses received at younger ages do not

count towards this requirement. Students may decline MenACWY vaccine after they have read and signed the MDPH Meningococcal Information and Waiver Form.

Additional Notes: Students who have previously taken the required MMR, Varicella, and Hepatitis B vaccines discussed above but who are unable to produce acceptable documentation must have titers drawn. Students who refuse to be vaccinated due to religious or medical reasons may be in jeopardy of losing their seat in the respective program, as most clinical agencies will not allow unvaccinated students to participate in direct patient care. Some clinical facilities where students will be assigned may require additional information and/or screenings prior to clinical placement.

Other Related Requirements:

CPR Certification – The CPR certifications acceptable for health students include "BLS Provider" from the American Heart Association (AHA), the American Red Cross, or the equivalent from the American Military Training Network. The copy must be front & back of the card, and it must be signed. An eCard from the AHA is also acceptable.

Technical Standards - Students must meet certain physical demands of performance so that they can successfully progress in their coursework and ultimately graduate. This form is completed and signed by the student.

Consent to Release Form – Student signature on this form permits the College to release personal information to clinical sites when requested to do so, such as vaccine records, Social Security Number, date of birth, and e-mail address.

National Background Check – A national county records search is also conducted through their Viewpoint account.

CORI and SORI forms –The student must complete the CORI (Criminal Offender Record Information) form to authorize a search of conviction and pending criminal case information under Standard Required Level I by the DCJIS (Department of Criminal Justice Information Services). As required, the student must provide the last six digits of their Social Security number on the CORI form and present a valid government-issued ID (such as a driver's license or passport) to verifying staff. The student must also complete the SORI (Sex Offender Registry Information) form. The CORI and SORI completion process will occur prior to the beginning of clinical/practicum experiences. If a student is late or is absent on the day the CORI/SORI check is completed, it is his/her responsibility to complete the CORI and SORI request forms at the Division of Health Sciences Administrative Office. The Division of Health Sciences may conduct subsequent CORI checks within one year of the date the student signed the form. The Division of Health Sciences will first provide the student with written notice of the check. The student may also be required

to complete subsequent CORI and SORI request forms in accordance with clinical facility requirements. If a CORI and/or SORI Report is returned with a finding(s), it may or may not prohibit progression in a Health Sciences Program. CORI and/or SORI findings will be forwarded to a college-wide Review Committee, and the student will be invited to the review session. The final decision regarding the student's progression in a Health Sciences program will be determined at that time.

**30-Day Grace Period: Massachusetts Law states that students subject to 105 CMR 220.600 (Immunization Requirements for Post-Secondary Students) may have a 30-day grace period after enrolling before all required immunization records must be submitted. Upon entering a Health Sciences program, students may also have a 30-day grace period from the start of the semester before being subject to withdrawal from their program provided if this does not interfere with the start of a required clinical rotation. If a program's clinical rotation starts sooner than 30 days, students in that clinical course must comply with the Division of Health Sciences' published deadlines in order to meet the standards of the clinical sites and begin their rotation on time. If the student does not have all records submitted and in the proper format by published deadlines or by the end of the 30-day grace period, whichever applies, he or she may be withdrawn from the program.*

Section E: Clinical/Practicum Policies

Introduction & Definitions

The purpose of this section is to present those policies and procedures that are most relevant to the clinical/practicum component of the programs**. The information contained in this handbook is subject to revision. Students will be given written notice of any amendments or revisions.**

The policies and practices are in addition to those stipulated in official College publications, the didactic policies portion of this handbook, and specific program course syllabi. **It is the policy of the College to reserve the right to add, withdraw, or revise any provision or requirement.**

To promote understanding of the scope of this handbook, the terms clinical, clinical fieldwork, clinical affiliations, and clinical rotations are used interchangeably and refer to the required clinical experiences of each of the programs.

Terms used for the various individuals involved with clinical education in the Health Programs include:

- **Clinical Instructor:** This term refers to any person recognized by the program as having the responsibility to supervise and assess the performance of any student while on clinical. This term is used interchangeably with **Clinical Supervisor, Clinical Faculty, Faculty and/or Clinical**

Preceptor. Either the college or the clinical site may employ the individual with this title, depending on the program.

- **Clinical Coordinator (CC):** This term refers to the college faculty member responsible for securing and/or assigning clinical placements, and for assessing the student's clinical performance. Other terms used to describe this individual include **Academic Fieldwork Coordinator (AFC), and Clinical Coordinator (CC)**. For the ADN and PN programs, the CC is the Program Chair.

- **Center Coordinator for Clinical Education (CCCE):** This term refers to the person employed by the clinical site whose responsibility is to coordinate and supervise the clinical program at each site. Other terms used to describe this individual include **Clinical Site Supervisor (CSS) and/or Clinical Instructor (CI).**

- **Preceptor:** This term refers to the person on staff at a clinical facility who supervises and instructs students in clinical experiences.

Individual clinical sites may use different titles for those serving in the positions listed above within their institutions. Refer to the program appendices for this information.

The clinical experience(s) is integrated within the overall program requirements. It provides practical experiences that augment laboratory and classroom learning and facilitates the transition from student to health care practitioner.

E.1.0 Professionalism

The student will adhere to all accepted standards, policies, procedures, rules, and regulations of the College, DHS, the program, the clinical site, and his/her profession's code of conduct. The student's performance and behavior must be safe and appropriate at all times. **Refer to the Professionalism and Affective Domain Standards and the program appendices for professional codes of conduct specific to each program/profession.**

E.2.0 Confidentiality

Of equal importance to the confidentiality of student records is the unequivocal requirement to preserve the confidentiality of any and all patient/client medical information. It is the moral, ethical, and legal responsibility of health professionals and DHS students to ensure that any and all medical-related information is held in confidence. Client information should only be shared with appropriate clinical personnel within the context of that personnel's need to know for the delivery of quality care. Students are

required to adhere to all such policies while in the clinical environment. All students will receive from the College patient privacy training (HIPAA) prior to clinical.

E.3.0 Health Status

It is the student's responsibility to ensure that completed physical exam and immunization records are submitted to and approved by Viewpoint. (See Section D. Health and Immunization Requirements.) Failure to submit this information and other required documentation could affect clinical placement and the ability to complete a Health Sciences program. Health forms are available from the Division of Health Sciences.

Should the student's health status change in a manner that would restrict clinical participation after he/she has health clearance and has matriculated in a DHS program, he/she MUST immediately notify the Department Chair. The student must also submit to the CC a note from his/her primary care provider indicating the nature of the restriction and the date at which the restriction(s) must be imposed. To re-enter the clinical environment, the student must submit a note from his/her primary care provider to the CC affirming the removal of restrictions and the date at which the student can resume unrestricted participation in clinical activities. If a student is unable to resume his/her participation in the program, he/she should refer to the Division of Health Sciences' Medical Leave Policy (Section C.1).

E.4.0 Communicable Disease Statement

Students have an ethical and legal responsibility to maintain a high standard of health. When providing care, the student should routinely and without discrimination take all precautions against exposure and transmission of communicable diseases consistent with the policies and procedures of the clinical site. The DHS student who has a communicable disease must inform the CC and the appropriate clinical instructor. Should there be any questions as to potential restrictions or precautions relating to clinical participation, the student may be required to seek medical advice and documentation from his/her primary care provider.

E.5.0 Emergency Care

The College's contractual agreement with clinical agencies states that emergency care will be provided by the clinical facility if that facility maintains an emergency room. Furthermore, the agreement stipulates that the student will assume the cost of such emergency care. Therefore, students should refer to their health insurance policy for coverage in the event of an emergency in the clinical area.

E.6.0 Latex Sensitivity & Allergy Policy

Latex products are common in the medical environment. Allergic responses to latex can range from irritation and allergic contact dermatitis to the possibility of life-threatening anaphylactic shock. Guidelines have been established at MassBay Community College to provide information to potential allied health and nursing program applicants/students who are sensitive to latex.

Latex-free environments are seldom available in either clinical or academic settings. Therefore, an individual with a latex allergy/sensitivity wearing alternative vinyl or nitrile gloves is still exposed to latex residue of others working in the area or to latex present in the equipment, models, and mannequins. Although latex gloves are the most prominent source of latex allergen, many other products contain latex, including, but not limited to:

- Blood pressure cuffs, medication vials, syringe connectors, and wound drains;
- Stethoscopes, catheters, respirators, and goggles;
- Oral and nasal airways, surgical masks, and electrode pads;
- Endotracheal tubes, syringes, IV tubing, and tourniquets.

Any student who has or develops symptoms consistent with latex allergy/sensitivity is advised to consult a qualified allergist for evaluation prior to enrollment in the Division of Health Sciences. If a student is already admitted to a Health Sciences program, he/she must consult a qualified allergist for evaluation of latex allergies should signs and symptoms develop. All such evaluations are at the student's expense. If it is determined that a student suffers from a latex sensitivity/allergy and the student desires an academic adjustment, including auxiliary aids or service, or reasonable accommodation due to this condition, the student must contact the College's Office of Accessibility Resources.

As with all matters related to one's health, the utmost precautions should be taken by the student to reduce the risk of exposure and allergic reactions. This may include the carrying of an epi-pen by the individual or other precautions as advised by the student's health care provider. It is the responsibility of the student with a latex sensitivity to understand and acknowledge the risks associated with continued exposure to latex during a clinical education, fieldwork, and healthcare career, even when a reasonable accommodation is made, and to regularly consult with his/her health care provider.

In an effort to minimize the presence of latex in the Division lab facilities, MassBay Community College will provide latex-free and powder-free gloves in all College lab facilities. Should a clinical agency NOT provide latex-free gloves, the College will provide latex-free gloves for clinical use. Additionally, the College is taking the following steps to minimize latex in its lab facilities: *1) replacement of all gloves in use by faculty and students with nitrile or vinyl gloves; 2) maintaining an inventory of products/equipment and supplies in each health science program that contain or could contain latex; and 3) future purchasing of latex-safe supplies and equipment whenever possible.*

As with all students in the Division of Health Sciences programs, a student with a latex sensitivity or allergy is required to satisfactorily complete all requirements and technical standards of the program to which they have been accepted.

E.7.0 Blood and Body Fluid Exposure Policy and Procedure

Occupational Exposure Guidelines

According to the Centers for Disease Control and Prevention, the primary means of preventing occupational exposure to HIV and other blood-borne pathogens is the strict adherence to infection control standards, with the assumption that the blood and other body fluids of all individuals are potentially infectious. The routine utilization of barrier precautions when anticipated contact with blood or body fluids, immediate washing of hands or other skin surfaces after contact with blood or body fluids, and careful handling/disposing of contaminated sharp instruments or other equipment during and after use is recommended.

For more information: https://stacks.cdc.gov/view/cdc/20711

2026 Surgical Technology Occupational Risks.docx

Faculty & Student Responsibilities

1. Receive agency/unit orientation regarding infection control policy and post-exposure management procedures.
2. Utilize appropriate barrier precautions during the administration of care to all individuals.
3. Utilize appropriate safety devices for the handling/disposing of contaminated sharp instruments or other equipment.
4. Immediately report accidental exposure to blood or body fluids.
5. Initiate immediate intervention of the management of accidental exposure to blood or body fluids.
6. Provide health education to individuals and groups regarding the prevention, transmission and treatment of HIV.

Accidental/Occupational Exposure Procedure

In the event of an accidental/occupational exposure to blood or body fluids, students and faculty should:

1. **Immediately** wash the area of exposure with soap and water.
2. **Immediately** report the incident to the instructor and/or supervisory personnel.
3. Complete appropriate documentation according to agency standards and provide a copy of the report to the Division of Health Sciences department chair. Another copy will be kept in the student's file.
4. Complete the Division of Health Sciences' Incident Report. This form is included as an appendix in this handbook; this **must be completed within 24 hours of the incident.**

PLEASE NOTE:

1. Decisions regarding post-exposure management, prophylaxis, and follow-up will be at the discretion of the individual and his/her health care provider.
2. The injured party will be financially responsible for emergency treatment, prophylaxis, and follow-up care resulting from the incident.

E 8.0 Accommodation for Disability Conditions

DHS students who request an accommodation in lecture, lab, or clinical due to a documented disability must inform the College Office of Accessibility Resources. The Office of Accessibility Resources, the Department Chair, and the Academic Coordinator of Clinical Education will determine if the accommodation is appropriate and reasonable. This means that the accommodation does not compromise either the essential duties/student teaching responsibilities at the clinical/practicum site or the requirements of the program's competency-based educational equivalents. (See Technical Performance Standards description and form in the Health and Immunization Requirements section of this Handbook.)

E 9.0 Clinical Sequence and Placement

E.9.1 The Clinical Coordinator or Program Chair determines the clinical placement of students. The primary consideration in arranging clinical placements is the academic integrity and value of the educational experience. A student shall not be placed at a site if he/she or an immediate relative volunteers or works in a department or unit within that site that is similar to his/her chosen field of study. When possible, advance notice will be given so that the student may make appropriate arrangements and clinical practicum sites may prepare for the student.

E.9.2 Contacting and arranging clinical affiliate placements is the purview of the Program Chair and/or Clinical Coordinator. Students **shall not** contact a present or prospective clinical site without obtaining prior approval from the Clinical Coordinator or Department Chair.

E.10.0 Transportation, Housing, and Parking Fees

The student is responsible for transportation to and from the clinical/student teaching sites as well as any parking fees. For programs with out-of-state clinical/student teaching sites, students are responsible for the cost of housing, transportation, meals, and other expenses unless otherwise provided.

E.11.0 Professional Appearance - Dress Code

While each program may have specific uniform requirements, all programs have the following expectations. The student must at all times:

E.11.1. appear neat, clean, and well-groomed.

E.11.2. maintain good personal hygiene.

E.11.3. adopt a conservative approach to dressing, minimizing jewelry and cosmetic/ fragrances, not wearing clogs, open-toed shoes or sandals, nor extremely loose-fitting or tight clothing.

E.11.4 wear MassBay student identification pin with name and his/her program of study.

E.11.5 remove personal pagers and/or cell phones before entering the clinical site.

E.11.6 limit body piercings to small, post-type earrings. Only one earring in each ear is permitted. No other body piercing jewelry is permitted in clinical and laboratory settings.

E.11.7 cover visible tattoos upon request in the clinical setting.

E.11.8 keep fingernails short and clean. Clear nail polish may be worn. Specific programs may have different policies. Artificial fingernails are not permitted.

Refer to individual program appendices for specific requirements.

E.12.0 Attendance

Attendance during the clinical affiliation is mandatory. Students are expected to report promptly, consistent with the schedule of the site and clinical faculty. It is unacceptable to schedule personal appointments during clinical hours. Tardiness and early departures are also unacceptable. If a student for any reason misses more than one-quarter of the scheduled clinical/student teaching day, he/she will be considered absent for the whole day.

E.12.1 Should illness or any other reason prevent the student from reporting to the clinical facility on time, the student must notify his/her clinical instructor, Clinical Coordinator, or appropriate College office at least 30 minutes before the scheduled start of the clinical day. Failure to notify either the clinical instructor or College of an absence is a serious breach of professional conduct.

E.12.2 If a student is ill and in danger of exceeding the attendance policy of his/her program, a note from his/her health care provider must be submitted to the Clinical Instructor at the affiliate and to the Clinical Coordinator at the college. The student will not be permitted to resume the clinical experience without a note from the health care provider stating that the student is capable of resuming (without restriction) all activities associated with the clinical education component of the program.

E.12.3 Any clinical skill acquisition or experiences missed due to absence, tardiness, or early departure must be made up at the discretion of the clinical instructor and approved by the CCCE and Clinical Coordinator. The determination as to which alternative assignments and locations may be required to make up missed days/hours and/or substitute for any missed clinical skill acquisition or experiences will be made at the discretion of the clinical affiliate, Clinical Coordinator, CI, and/or the Department. Chair at the College.

Refer to the appendices for individual program policies and/or syllabi.

E.13.0 Evaluation of Clinical Performance

Each program develops instruments and assessments used to evaluate student clinical performance. Refer to the appendices for the clinical grading policies for the respective program. The CC /CI/Department Chair will issue grades consistent with the policy contained in the College catalog and course syllabus. In most programs, clinical experiences are graded pass/fail. Grades: Clinical grades below the program's specific minimum will result in withdrawal from the program. Refer to the minimum grade information in section A2. Students who are having difficulty meeting the established learning objectives of the clinical experience are encouraged to seek prompt advice and/or assistance from the CCCE, CC, and /or the clinical instructor/faculty to develop a learning plan to address concerns.

E.13.1 Unsatisfactory clinical performance is defined as performance within the clinical environment that demonstrates:

E.13.1.1 consistent pattern of weakness in one or more clinical behaviors/skills objectives

E.13.1.2 failure to demonstrate progressive mastery of clinical behaviors and objectives

E.13.1.3 performance requiring more guidance and instruction than that required by other students at the same level.

If a student does not comply with the academic, professional, or clinical standards listed in this policy manual or the MassBay Student Handbook, a DHS administrator or faculty member will issue a written warning. The student must sign the warning. NOTE: **Signature on the warning** does not constitute the student's agreement with the content of the warning. Space is provided for the student to indicate his or her non-agreement and comments. The original signed copy of the written warning will be placed in the student's record, and a copy will be given to the respective program chair. Should the student refuse to sign the form, the faculty will obtain a witness signature attesting that the notice was given to the student.

E.14.0 Clinically Unsafe Behavior

The following are examples of clinically unsafe behavior**:**

E.14.1 Any incident in which the student's action has or may seriously jeopardize patient care and/or safety. Examples of such actions include, but are not limited to:

E.14.1.1 errors of omission/commission in patient care;

E.14.1.2 any pertinent intervention which places another in danger;

E.14.1.3 failure to report changes in patient status promptly;

E.14.1.4 acting outside of the legal and ethical role of the student as defined by professional standards;

E.14.1.5 abusive behavior;

E.14.1.6 not being accurate regarding any personal conditions that may jeopardize patient care or about the student's own learning needs;

E.14.1.7 repeated and/or consistently unsatisfactory clinical performance which compromises quality of care when the student also demonstrates one or more of the following:

E.14.1.7.1 multiple failed assignments, lab assessment scores or didactic average that falls below the acceptable standard set in the course syllabus.

When a faculty member determines that a student has been clinically unsafe,

1. the student will be immediately removed from clinical and lab settings.
2. the student will be notified immediately that they have been given an unsafe clinical grade and will not be permitted to return to clinical or lab. If the student is in another health course with a clinical component, the student will not be allowed to attend the clinical or lab unless the faculty member and department chair determine that patient safety is not at risk. Written notice by the faculty member will be given to the student, documenting the reasons for the clinically unsafe determination.
3. The faculty will notify the department chair and the appropriate academic administrator that a failing grade has been issued.

The grade submitted for the course where the unsafe clinical practice occurred will be an F.

Any student who receives an F due to unsafe clinical practice will not be eligible for re-admittance to a health program. The student may appeal the unsafe clinical grade by following the Grade Appeal Process described in the MassBay Student Handbook.

E.15.0 Drug Screening Policy

Massachusetts Bay Community College is committed to the promotion of the health and safety of patients, students, faculty, and staff, and our community members, including those with physical, psychiatric, or substance abuse concerns. Policies and procedures are established with this commitment in mind. To ensure that patient care is not compromised, facilities and agencies engaged in patient care have begun to require mandatory drug testing of all their employees and any affiliating groups.

Accordingly, students enrolled in Health Sciences programs may be required to provide proof of a negative ten-panel urine drug screening in order to be eligible for clinical placement if required by the clinical site where the student is assigned. Drug screening will be random at the discretion of the Program. Drug screening must be done through the student's Viewpoint Account before the start of a clinical rotation. Viewpoint will provide step-by-step instructions on how to obtain a drug screening at a local testing facility. Students taking prescription or over-the-counter medications will have the

opportunity to provide a list of medications to Viewpoint. All costs associated with drug testing are the responsibility of the student.

Drug-screening results will be sent to the Dean of Health Sciences in a confidential manner. Students who do not pass the drug screening test the first time have the right to request a second drug screening prior to their clinical rotation. If the second drug test is negative, the student will be placed in a clinical rotation. If the second test is positive, the student will be ineligible for clinical placement and recommended for withdrawal from their health program, contingent on due process. Students who fail to comply with any aspect of the drug-screening requirement or who receive positive results will be ineligible for clinical placement and subject to dismissal from the Health Sciences program in which they are enrolled.

Health Sciences clinical affiliating agencies may also have policies on random or scheduled on-site drug screening of students. Students must comply with all clinical facility policies. A positive drug test result from the clinical site will result in the student's immediate removal from clinical and recommendation for dismissal from the Health Sciences program. In the event a faculty member has a reasonable belief that a student is under the influence of alcohol or drugs, the faculty member will immediately remove the student from the clinical setting and follow the College's policy on Alcohol and Drug Use. The student will be sent to the Emergency Department for further evaluation and drug/alcohol testing if necessary. A student under the influence of alcohol or drugs in a clinical setting shall be subject to discipline, up to and including expulsion from the College, in accordance with the College's Alcohol and Drug Use Institutional policy.

Any student who is withdrawn from the Division of Health Sciences due to a positive drug test may appeal this decision through the Division's Appeal Process. Please see the Appeal Procedure in the Division of Health Sciences Handbook. Any student who is withdrawn from the Division of Health Sciences program due to a positive drug test may reapply based on current College and Division of Health Sciences readmission policies.

All students will be notified, in writing, of the requirement for drug screening when enrolling in a program that requires such screening. This form can be found in Section III.

While the recreational use of marijuana is permitted in Massachusetts, marijuana remains classified as a controlled substance under federal law, and its use, possession, distribution, and/or cultivation at educational institutions remains prohibited. Accordingly, students who test positive for marijuana are unable to participate in clinical education, which will affect their status in the program. A student who has a prescription for medical marijuana and seeks to use medical marijuana off-campus during semesters where they have clinical rotations shall contact the College's Accessibility Resources Office. Accessibility Resources will consider the student's request as a request for reasonable accommodation and will engage in an interactive dialogue with the student to determine an effective and reasonable accommodation for their disability. Accessibility Resources will, among other things, request medical documentation to confirm the disability, including the student's Medical Marijuana Card. Use of medical marijuana off-campus during the clinical education shall not be considered a reasonable accommodation if its continued use would impair the student's clinical performance, pose an unacceptably significant

safety risk to the public, or violate the College's affiliation agreements with its hospital partners, thereby jeopardizing those affiliations.

Steps

1. Each student enrolled in a program that requires drug screening will be notified of the requirement to report for drug screening to the testing agency. Students will be given 48 hours to complete the drug screening requirement. Students will contact the specified testing agency to schedule an appointment within the specified time period.

2. Students must follow the instructions given by Viewpoint to comply with the screening protocol. Failure to participate in the drug screening process or comply with the protocol will result in the student's inability to participate in the clinical education and, consequently, will result in the student's dismissal from the program.

3. Viewpoint will provide results to the Dean of Health Sciences at Massachusetts Bay Community College. Results can only be accepted directly from Viewpoint. The Dean of Health Sciences will provide the applicable department chair or program coordinator with a list of those students who have completed their drug screening and are eligible to participate in clinical or field education.

4. Students whose results fail to satisfy the screening criteria will not be eligible to participate in the clinical education and consequently will be dismissed from the program unless the disqualifying factor can be satisfactorily remedied.

5. Students with a positive drug test may challenge the results of the test within five (5) days of notification of the drug test results. This challenge must be in writing and delivered to the Dean of Health Sciences.

Section III: Division of Health Sciences Forms

Division of Health Sciences Technical Standards Form

It is necessary for all Division of Health Sciences students to review and sign the following.

Please circle your program from the list below, then sign and return as directed.

ADN	Associate Degree Nursing	PB	Phlebotomy
CT	Computed Tomography	PM	Paramedicine
CY	Central Processing Technology	PN	Practical Nursing
EMT	Emergency Medical Technician	RT	Radiologic Technology

TECHNICAL PERFORMANCE STANDARDS		ADN	PN	PB	PM/ EMT	NA	RT/CT	ST/ CY
MUSCULAR And SKELETAL	Work at areas located at various positions and elevation levels for durations of at least 30 minutes at a time alternating with the need to make frequent changes in body positions	X	X	X	X	X	X	
	Maintain a standing body position for a minimum of two hours, while performing work related functions	X	X	X		X		X
	Transfer and position movement dependent patients from / to various positions and surfaces, such transfer / positioning frequently requiring a minimum of a 50 lb. weight bearing load	X	X	X	X	X	X	X
	Move / push / pull / reach equipment and accessories of various weights and sizes from a variety of heights to a variety of heights	X	X	X	X	X	X	X
	Perform CPR on adults, infants, and toddlers	X	X	X	X	X	X	X
	Detect and distinguish between variations in human pulse, muscle spasm & contractions, and / or bony landmarks	X	X	X	X	X	X	
	Safely guide patient in ambulation on level as well as inclined surfaces and stairs, often while the patient is using a variety of assistive devices. In either case, guard patient against falls or other injury	X	X	X		X	X	

	Apply gradated manual resistance to patient's individual muscular actions in order to determine patient's strength or to apply exercise techniques for stretching or strengthening	X	X	X		X		
	Quickly move from one site to all other areas of the health care facility	X	X	X	X	X	X	
AUDITORY	Detect and appropriately respond to verbally generated directions and acoustically generated monitor signals, call bells, and vital sign instrumentation output	X	X	X	X	X	X	X
VISUAL	Detect and discriminate between various human gestures and non-verbal responses	X	X	X	X	X	X	X
	Detect and discriminate between large and small gradations in readings on dials, graphs, and displays, such detection made at various distances from the source.	X	X	X	X	X	X	X
	Read printed and computer screen manuscript text	X	X	X	X	X	X	X
	Discern a patient's physical status at distances in excess of 10 feet and in subdued lighting	X	X	X	X	X	X	
	Detect and discriminate between the range of image brightness values present on radiographic and computer screen images						X	
MANUAL DEXTERITY & FINE MOTOR SKILLS	Manipulate/adjust various types of switches, levers, dials, control, and/or hand-held equipment and/or in various combinations	X	X	X	X	X	X	X
	Hold and use a writing instrument for recording patient history or pertinent information	X	X	X	X	X	X	X
	Apply gown, gloves, and mask for Universal Precautions when needed	X	X	X	X	X	X	X
VERBAL	Articulate clearly to a patient in conversational English regarding therapeutic goals and procedures	X	X	X	X	X	X	X
OLFACTORY	Detect changes in environmental odor and (temperature)	X	X	X	X	X	X	X
	Function within environments which may be stressful due to fast pace, need for accuracy, and distracting sights and sounds	X	X	X	X	X	X	X

ENVIRONMENTAL	Recognize that the academic/clinical environment includes exposure to disease, toxic substances, bodily fluids, and/or radiation	X	X	X	X	X	X	X
	Exhibit social skills necessary to interact effectively with those of the same or different cultures with respect, politeness, and discretion	X	X	X	X	X	X	X
	Maintain cleanliness of personal grooming consistent with close personal contact	X	X	X	X	X	X	X
	Function without causing harm to self or others if under the influence of prescription or over the counter medications	X	X	X	X	X	X	X

Technical Performance Standards Informed Consent

1. I have received, read and understand the meaning of MassBay Community College's Health Professions Technical Performance Standards.

2. I understand that the Standards indicated, as applicable to my intended program of study, relate to the full array of essential performance competencies inherent to my chosen program of study.

3. I also understand that in order to successfully graduate from the program of my choice, I must be able to satisfactorily perform the tasks listed in the standards.

4. It is my responsibility to submit a request to the College's Disability Resources Office should I wish to receive a determination of reasonable accommodation in performing any of the stated standards.

5. Lastly, I understand that there may be instances where a reasonable accommodation for a method of satisfying the required performance tasks may not be possible.

Performance Notification Form

Student's Name _____

Faculty / Administrator's Name _____

Date _____

It has come to the attention of the faculty member / administrator named above that your performance has fallen below acceptable standards or your behavior has violated one or more of the policies of the program, division, college and/or clinical affiliate. The specific lapse in performance level / policy infraction is as follows:

If appropriate corrective action is possible, you must satisfy the following expectancies by any dates / time frames specified:

Should you fail to affect the above requirements as stipulated by the dates / time frames stipulated, the following consequence will occur:

FACULTY / ADMINISTRATOR SIGNATURE _____ DATE _____

Student Comments:

I agree with the above described assessment and prescribed action: [] yes [ ] no

STUDENT SIGNATURE: _____ DATE:

(NOTE: Student signature indicates only that the student was given this notification, not that the student agrees with the content of the notification.)

WITNESS SIGNATURE: _____ DATE: _____

(NOTE: Witness signature verifies that this notification was given to the student, but the student refused to sign as required)

NOTIFICATION TO STUDENTS OF RANDOM DRUG SCREENING ANALYSIS REQUIREMENT

Please be advised that students enrolled in the _____ Program at Massachusetts Bay Community College will be required to undergo and pass random drug screening analysis in order to be eligible for placement at a clinical facility or in the field. Students who either fail to pass, refuse to submit to, or fail to schedule and take a drug screening analysis within the designated time frame will be deemed ineligible for clinical placement, which will negatively impact their status in the program.

If you have any questions pertaining to this policy, please contact the Dean of Health Sciences.

By my signature, I acknowledge that I have been provided with the Massachusetts Bay Community College Drug Screening Policy and notification that I am required to undergo and pass the drug screening analysis. I am aware that refusing to submit to, failing to schedule and take the drug screening analysis, or failing to submit to or pass the drug screening analysis will result in my being ineligible to participate in clinical education, and consequently, I will be dismissed from the program.

Program Description

The Surgical Technology Program at MassBay Community College prepares graduates to function as members of the surgical team, assisting the surgeon, registered nurse, or anesthetist in a variety of surgical arenas. Students develop knowledge and skills in maintaining aseptic technique within the surgical areas of health care delivery. Graduates are prepared to take the National Board of Surgical Technology and Surgical Assisting (NBSTSA) Certifying Examination.

The curriculum combines didactic, laboratory and clinical experience with an emphasis on acquiring clinical skills. The study of operating room technology is planned sequentially, making use of all prior learning so that students can synthesize course material and focus on applying it in operating room practice. Students will have clinical experiences in a variety of surgical cases

MassBay Community College's Surgical Technology Program is accredited by the Commission on Accreditation of Allied Health Education Programs (www.caahep.org) upon the recommendation of Accreditation Review Council on Education in Surgical Technology and Surgical Assisting/ARC/STSA.

Clinical Case Requirements

The MassBay Community College program encompasses 2 semesters of clinical training in the operating room. Students meet or exceed the minimum of 120 in-person Clinical Cases in operating rooms as required by the National Board of Surgical Technology and Surgical Assisting (NBSTSA) and are part of a student's eligibility to take the NBSTSA examination upon graduating from the program. The clinical case requirements are part of the core curriculum for accredited surgical technology programs.

Philosophy Statement

Surgical Technology comprises a unique body of knowledge that is both a science and an art. It is essential that the surgical technologist have current knowledge of surgical technology concepts, principles, and skills in order to carry out the motto of the profession, "Aeger Primo" – the patient first. Students will leave the Program with an in-depth understanding of the principles of asepsis, surgical procedures, communication, human development, teaching/learning principles, biological/social sciences, and current technology used in the profession.

Mission

The Mission of the MassBay Community College Surgical Technology Program is to prepare its graduates as entry-level surgical technologists who are knowledgeable and skilled, and who have developed the essential behaviors of the profession. This preparation will occur in the cognitive, psychomotor, and affective learning domains.

Goals and Minimum Expectations

"To prepare entry-level Surgical Technologists who are competent in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains to enter the profession."

To accomplish the Mission of the Program, the instructors and graduates of the Program will realize the following Cognitive Domain, Psychomotor and Affective Domain Goals:

Cognitive Domain

The goal of the program is to provide students with a comprehensive background in the basic sciences, with mastery of aseptic technique, with perfection of surgical skills, and with a keenly developed surgical conscience as established in the AST Core Curriculum, 7th Edition.

Objectives

a. Apply the knowledge of anatomy, physiology, microbiology, and pharmacology to the care of the perioperative patient as it relates to the role of the Surgical Technologist.
b. Utilize knowledge and skills to attend to the physical, psychological, and social needs of the patient.
c. Qualify to sit for the NBSTSA Certification Exam.
d. Demonstrate recognition of the need for continuing education to enhance their professional and personal growth to keep up with technological advances in medicine.
e. Apply medical terminology to communicate clearly and effectively with patients, families, physicians and co-workers.

Psychomotor Skills:

The goal of the program is to teach professional techniques that will promote independent practice of clinical skills.

Objectives:

a. Demonstrate perioperative technical skills and knowledge in a safe and effective manner.

b. Exhibit safe practice methods involving preparation routines of the intraoperative environment, patient positioning, and emergency procedures.
c. Display and incorporate aseptic principles in the intraoperative setting.
d. Actively participate in the scrub role in a variety of procedures in surgical specialty areas according to hospital policy.
e. Maintain a grade of 73% or better in all courses in the program.

Affective Domain:

The goal of this program is to develop surgical technologists who practice standards in a professional manner to provide patients with quality care.

Objectives

a. Attain comprehensive ethical, legal, moral, and cultural awareness as they relate to the surgical technologist's ability to provide patient care and how this awareness fosters cooperation and success among members of the surgical team.
b. Shows the importance of and the ability to model the professional attributes of the Surgical Technologist, including the maintenance of a strict 'surgical conscience'.
c. Practices dependability, honesty, and integrity in clinical practice.
d. Utilize critical thinking to perform the duties of the surgical technologist.
e. Demonstrate accountability in their practice based on current knowledge.

Surgical Technology Program Outcomes

Successful graduates of the Program will be able to:

1. Demonstrate accountability and ethical decision-making as a member of the surgical team (Affective);
2. Demonstrate the value of becoming a lifelong learner in the profession (Cognitive);
3. Communicate effectively and advocate for patient safety as a member of a multidisciplinary surgical team (cognitive);
4. Provide safe, effective care of the surgical patient based on the principles of asepsis (affective/cognitive/psychomotor).

Surgical Technology Education

The Mass Bay Community College associates degree in surgical technology follows the ARC/ STSA 7th edition Core Curriculum for Surgical Technology (CCST-7e).

Certification Examination Requirement

All students who complete the Surgical Technology Associate Degree program at MassBay are required to take the NBSTSA certification examination on campus with their graduating class. The test is given as a computer-based test. The cost of the examination is approximately $250

and is the student's responsibility. There are NO exceptions to taking this examination in this format or on the designated date.

Teaching/Learning

The MassBay Surgical Technology program is presented in a combination of formats, from Online self-paced to in-person, traditional classroom lecture periods and small-group hands-on simulation training sessions. Students are expected to participate fully in all formats and engage with their peers and instructors in order to master the material and demonstrate proficiency. Successful learning is evidenced by the development of vital operating room-specific competencies alongside the institutional learning outcomes enumerated for the Mass Bay associate's degree in science for Surgical Technology.

Admissions Criteria

1. High School diploma or equivalent, or associate degree or higher
2. MassBay Placement into English Composition I (EN 101)
3. Completion of MA 095/MA 105X/MA 106X, OR MassBay Placement into MA 098/MA 102X/MA 104X or higher).
4. Successful completion of the Reading Assessment Test with a score of 246 or higher.
5. Completion of a 3-credit Medical Terminology Course, with a grade of C or higher
6. BI 101 General Biology with a grade of C or higher

A person who has accepted admission into the Surgical Technology Program understands that they must meet all health, immunization, and Basic Life Support (BLS) provider CPR certification requirements and CORI/SORI clearance requirements by the published deadline in order to obtain a “COMPLIANT” report in the Viewpoint online documentation clearance tool. If a student accepts admission and is not ready to begin clinical by the published date, he/she understands that he/she will be withdrawn from the program and will not receive a tuition refund. There are no exceptions to this requirement, and there is no guarantee of readmission. All students must submit all required immunization records and BLS Provider CPR and be cleared by Viewpoint prior to attending the clinical portion of the Program. There are no exceptions to this policy. Students who are not medically cleared will not be assigned to a clinical site.

Students will meet the immunization requirements by the end of SX-100 Fundamentals of Surgical Technology. Students who do not show “Compliant” status at the end of SX 100 will be subject to the following Affective Warning schedule:

1. Completion of SX-100: First Affective Domain Warning. (last day of class)
2. Jan 1: Second Affective Domain Warning.
3. First day of class, Spring semester: Third Affective Domain Warning and recommendation of dismissal from the program

Readmission Criteria

1. See Section IIB

2. Students who are readmitted to the Surgical Technology Program are expected to fulfill the requirements of the current MassBay College Catalog at the time of readmission to the Program. In addition, students must meet all Admissions requirements at the time of admission if their academic program has been interrupted for more than one semester.

Advisors

All Surgical Technology students will have an assigned advisor. Students are urged to see their advisors for academic and clinical concerns, career plans, and other issues that arise. Advisor input is an essential component in the registration process.

Attendance

(See Section IIA)

Surgical Technology students will comply with the attendance policy as stated in the College Catalog, and the sections cited above of the Division of Health Sciences (DHS) Student Handbook and Policy Manual. Attendance is mandatory for classes, laboratory sessions, and clinical affiliations. The Surgical Technology Program has a zero-tolerance absence policy for class and clinical/lab. Class, clinical, and lab absences should not occur except for extenuating circumstances

Due to patient care and staff preparation requirements, students must report to the clinical area on time. If the student is late, it is a clinical absence. Absences may result in program withdrawal. The Surgical Technology Program has a specific clinical attendance policy document that each student signs, and a copy is provided to the clinical sites. This document is attached in section IIA. If a student misses clinical due to illness that is not safe to expose OR patients and staff, the student understands that they may be asked to obtain clearance to return from their physician. The potential cost of any office visits related to clinical return is the responsibility of the student. Course faculty will determine a clinical make-up assignment. If a student has more than 3 clinical or laboratory absences, the student may be withdrawn from the course.

1st Absence: Verbal Warning

2nd Absence: First Affective Domain Warning

3rd Absence: Second Affective Domain Warning

4th Absence: Third Affective Domain Warning and recommendation for Dismissal

The student may petition the Program Chair/Clinical Coordinator for a case-by-case review. Documentation and verification of extenuating circumstances must be submitted along with a record of past class/lab/clinical absences in surgical technology courses. The option for a third clinical make-up day is further based on space available within the pre-existing clinical rotations. Clinical make-up opportunities are not guaranteed. In the case of a student's absence on a clinical day, one of the following may be implemented: an alternate clinical assignment OR a

clinical make-up day if it is permitted by the hospital first. MassBay cannot send a student to clinical for a makeup day if it is not granted first by the hospital.

Note: Students should follow guidelines established by the Department Chair/Clinical Coordinator for each clinical rotation with regard to notification of a clinical absence.

Clinical Policies and Procedures are explained in detail in a Pre-Clinical Orientation with the Clinical Coordinator for Surgical Technology. Attendance at the Pre-Clinical Orientation is mandatory and occurs approximately three months prior to the start of the first semester of clinical. The date of the orientation is published six months prior to the event, and students must attend and be present for the entire event.

Communicable Disease Policy

(See Section IIE)

The Clinical Externship

Students in the health programs are expected to deliver care without prejudice to all patients. The only exception to the above would be in consideration of personal risk factors, such as in cases of pregnant students or those in a state of immunosuppression. Students in the health science clinical programs must have an ethical and legal responsibility to deliver the highest level of care to the best of their ability.

Surgical Technology students in the clinical externship must clearly identify themselves as Mass Bay students/non-credentialled member of the surgical team. They are not employees of the institution. The clinical affiliation contracts between MBCC and the facilities describe this with great specificity.

While at their clinical externships, Surgical Technology students are expected to follow the uniform requirements stated in Section E.11 of the Division Handbook. Surgical Technology students must keep their nails short and may not wear nail polish of any kind.

Grading Policies

(See Section IIA)

See also: “Graduation Eligibility and Competencies” and “Academic Regulations” in the current College Catalog.

Grading Policy – Surgical Technology Program

A grade of 73% (or ‘C’) or better is required for all courses in the AS of Surgical Technology program. This minimum grade threshold policy applies to classroom, lab, and clinical courses, as well as all courses in the degree program. The combination of successful course completion and minimum surgical completion is the criteria for successful completion of the Surgical Technology Associate Degree program. See course syllabi for additional course policies.

Clinical performance is evaluated on a **Satisfactory/Unsatisfactory basis.**

Grade Appeal and Grievance Procedures

(see the current MassBay Community College Student Handbook)

DIVISION OF HEALTH SCIENCES STUDENT AGREEMENT FORM

I, the undersigned student, having read and reviewed the entirety of the MassBay Community College Division of Health Sciences Handbook and the addendum specific to my program, do agree to adhere to and abide by all College and Health Program policies and/or their amendments during my matriculation at MassBay Community College. Furthermore, I agree to adhere to the conduct codes and performance policies of the Clinical Education sites to which I may be assigned. I clearly understand that the failure to adhere to and abide by these policies and regulations of the College, Program, Hospital and/or Clinical Site may result in my removal and subsequent withdrawal from the clinical site/classroom and/or program. I also understand that in addition to faculty employed at the College, there may be employees of the Hospital / Clinical Agency or Practicum site which are designated by the College as a Supervisor/Preceptors / Clinical Instructors. As such, these individuals will be functioning as members of the team of instructors within one or more of the Program's clinical or practicum courses. Therefore, I understand that assessment/evaluation information about my academic and/or clinical or practicum performance may be shared with the designated / appropriate Supervisor or Clinical Site staff member(s) for the sole purpose of providing them with information needed by them for patient/client assignment or College-required clinical performance evaluation/assessment. Furthermore, my academic and/or clinical records may be reviewed by duly authorized representatives of professional, state, or national accreditation agencies. I further understand that the Hospital or Clinical agencies or practicum site to which I may be assigned may require that I receive clearance from the Commonwealth of Massachusetts, that I do not have a criminal record of an offense which would compromise the safety or well-being of the clients or patients of that site. Therefore, I understand that my name will be submitted to the state for a CORI (criminal offense record inquiry) and SORI (sexual offense record inquiry) check. A CORI/SORI check report of such an offense may preclude my eligibility for a clinical or practicum assignment and thereby may negate my matriculation in the program. Lastly, I understand that I am required to satisfy the Division of Health Sciences' immunization report requirement and my program's CPR requirement by published deadlines. Failure to do so will preclude my eligibility to participate in the clinical or practicum phase and may result in my inability to complete the program.

Please sign and date this form and submit it to your "Viewpoint Screening" account unless instructed otherwise by a faculty member.

Student's Name (Printed)_____ Date: _____

Student's Signature _____ ID: _____

NOTE: Submission of this form is required for matriculation in the Program.
