

Teach Out Curriculum

Associate Degree Nursing End of Program Student Learning Outcomes

Graduates of the program will be able to:

Nursing Science and Knowledge

Integrate nursing concepts with theoretical and scientific knowledge to promote evidence-based, holistic patient care.

Integrated Reasoning

Apply principles of critical thinking, creativity, and innovation to formulate clinical and other nursing judgments.

Professionalism and Leadership

Assume responsibility and accountability for pursuing professional growth, acting as a leader and agent for change while upholding high standards of ethical practice.

Patient-Centered Care

Provide patient-centered care and health education based on respect for patient/family values and preferences, while engaging the patient as a partner in the process.

Quality and Safety

Monitor individual performance and system effectiveness to improve the safety and quality of care.

Communication and Teamwork

Actively collaborate as a member of the healthcare team; promoting mutual respect, open communication, and shared decision making.

Systems-based Practice

Utilize a variety of systems to manage nursing care, including technological and information systems.
